

The 5000 Series is designed with durability in mind, from the vanes turning the motor to the hammer frames and anvils. Proprietary hardening and treatment processes and excellence in manufacturing all add up to the longest lasting, hardest hitting impact tools in the business. For the installation and maintenance of heavy equipment, the heavy duty 5980A1-EU with its slogging mechanism is perfect for loosening and tightening large nuts and bolts. It comes complete with horizontal and vertical hangers for multi-position operation making it indispensable for applications in shipyards, steel mills, refineries and chemical plants.

- Performance for fast removal and tightening of large fasteners
- Convenience : portable, easy to handle or suspend with vertical and horizontal hangers
- Exceptional durability with built-in lubricator and high resistance hammer case
